

Virtual Classroom Training

DATASHEET

Saving time and money through Virtual Classroom Training

Many organisations with dispersed workforces are looking for ways to make their training and project budgets go further by reducing travel and accommodation overheads. By using Larmer Brown's Virtual Training Solution, travel and accommodation cost is not only reduced but totally eliminated.

The use of Virtual Classroom Training also reduces the time out of the office for students and is beneficial to the environment as it eliminates travel completely.

Virtual Classroom Training is Live Instructor-led training brought to your students through Web Conferencing and Collaboration technology. Students receive live teaching and demonstrations from the Instructor, and are then supervised through hands-on exercises. The result provides the benefits of classroom training direct to the desktop.

These classes are particularly beneficial to companies with distributed workforces, allowing all participants to participate from their homes or office desks with no travel time or cost involved.

The daily schedule allows some time for participants to stay in contact with critical email and communication, rather than be completely out of touch for several days.

Larmer Brown's Virtual Classroom Training has the following features:

- Live Instructor-led training
- Real-time chat, polling, Q&A, application sharing and 'whiteboarding'
- Practical work allocation and review
- Efficient training schedule
- 3 hour morning 'classroom' sessions
- Afternoon individual practical work
- Larmer Brown Student Training Reference Guides
- Pre-course set-up and connection session, to ensure the technology is working
- Access to Larmer Brown's Hosted Development Server for practical work
- Recorded sessions available 24/7 for revision, for one month following the class
- Available to anyone with an internet connection
- One-company courses can be customised to specific project requirements

Other Virtual Services

In addition to Virtual Classroom Training, Larmer Brown also offers a number of related Virtual Services.

The following Workshops can be delivered:

- Planning and Awareness Workshop
- Technical Requirements Workshop
- Standards Workshop
- Individual Coaching and Mentoring

These workshops are important steps in the planning and set-up of new development projects. Leveraging Larmer Brown's UPK experience through these workshops will significantly reduce risk and improve the efficiency of the development work.

Please see our separate datasheets for further information on these Workshops.

Virtual Quality Control and Mentoring

Larmer Brown can support Content Development Project Teams by offering quality control and mentoring as a virtual service. In these sessions the Larmer Brown Consultant will review the work produced by the UPK developers and then provide individual feedback and coaching, to enable them to quickly get up to speed with the best UPK development techniques and quality standards.

About Larmer Brown

Larmer Brown's primary business objective is to help organisations realise the desired business benefit of their software applications, through successful user adoption programmes. We have been using User Productivity Kit Professional technology to provide business transformation, documentation and training services since 1994. Larmer Brown is an Oracle Certified Partner and Oracle's UPK preferred services partner.
